

Kelly Freas was born in Hornell, New York and reared in Canada. He attended Catholic University and Georgetown University in Washington, D.C., Columbus Art School in Columbus, Ohio, Carnegie Tech and Art Institute of Pittsburgh in Pittsburgh, Pennsylvania. He has exhibited in one-man and group shows in New York, New Jersey, Pennsylvania, Virginia, Ohio and Mexico; and he gives frequent lectures on his work. He has been in Science Fiction for a little over 20 years, and has won the Hugo seven times, of which he is justly proud. He has also been given the title of Dean of Science Fiction Illustrators, and his posters and prints have won national awards.

Besides science fiction, he worked for MAD magazine for several years, doing the front, back and inside covers during most of that time. Recently he created the little character on CRAZY and has been doing their covers. He has done portraits, religious art, technical illustrations, medical art, cartoons, etc., and once in a while when it is necessary to meet the budget, he does advertising. But science fiction is probably his first and only true love. He is well known for the thought and research he puts into his illustrations, and the search for data has taken him from the launch pads of Cape Canaveral with the Space Program, to the bottom of the Atlantic in a nuclear submarine.

His wife, Polly, works with him in most of his ventures, being the business partner of the family. There is a daughter, Jacqueline, in her first year college, and a son, Jerry, in his last year of high school, both of whom turn up frequently in illustrations.

Ladies and Gentlemen, you are being controlled. No it's not the Deros this time, it's Bob Tucker. Tucker has for years held you in his thrall without your knowledge.

It all began when he worked for the Roosevelt administration in 1935. He set up The Great Staple War, an effort that in later years evolved into the War On Poverty and the food-stamp program. He retired from government shortly after his first death, which took place in late 1935 and caused the letter column of Astounding to become sercon ever after. (At least until 1938....)

This forced retirement permitted Tucker to launch his most famous effort in propaganda, his fanzine Le Zombie. Since the magazine was supposedly published every time a zombie awoke, Tucker published an issue after he heard of the death of a fan. Most fannish deaths in those days were greatly exaggerated, of course. Tucker suffered several of them, until they no longer affected him at all. At that time he stopped publishing fanzines.

Our hero then turned to writing, becoming famous as a mystery author. Earl Stanly Gardener and Robert Blotch were his most famous pseudonyms; when he occasionally wrote science fiction, he was known as Vektis Brack and Volsted Gridban. Arthur Leo Zagat once said of him, "Do you have fireflies there?"

For several years Tucker was also employed in the motion picture industry.

Over the years Tucker has built up his power. The greatest demonstration of his fannish sneakiness came when he was designated contractor for a hotel for the World Science Fiction Convention. Fans were to send him a brick through the mail for the hotel's construction. Shortly thereafter, Tucker moved without leaving a forwarding address. This maneuver clearly demonstrates the Machiavellian nature of Tucker's brilliant though devious mind.

His great wit has brought him power; and so it is that the Minnesota Science Fiction Society honors the True Secret Master of Fandom, Bob Tucker.

MINICON 8 Program

All events are in the Regency Room (4th floor) unless otherwise noted.

FRIDAY 12 APRIL 1974

SF IS FUN!

The banquet will take place Saturday evening at 6:00 in the Coronation Room (5th floor). It will be preceded by a cocktail hour beginning at 5:00, also in the Coronation Room. The banquet costs \$5.00 per person, and the menu consists of the following:

Tossed Salad

Chopped Sirloin Steak with Mushroom Sauce

French-Style Green Beans

Baked Potato

Creme de Menthe Ice Cream

Your choice of Beverage

Following the banquet, the Guests of Honor will present their speeches in the Regency Room (4th floor).

The cover for this program book is by Jim Odbert. Guest of Honor illustrations on pages 2 and 4 are by Kelly Freas, with the illo on page 4 based on photos by Fred Haskell. The editing is by Don Blyly, Ken Fletcher, and Jim Young, with typing assistance by Jerry Stearns. Special thanks to those members of the Minnesota Science Fiction Society who have donated time and space to the collation of this program book and the other Minicon publications.

AFTER ALL, THAT'S WHY YOU STARTED READING THE STUFF

But now, as a more serious fan, collector, convention-goer, etc., you are interested in more than just reading the fiction itself—you have started looking deeper into the field, and discovered the same dull, somber reference books in F/SF that you encounter in other fields.

WELL, from SOME publishers . . .

WE at THE MIRAGE PRESS, Ltd., do things a bit differently! We try to make our F/SF reference works just

as readable and enjoyable as possible. May we recommend:

AN ATLAS OF FANTASY, by J. B. Post

All the maps Rand McNally refused to print; with humorous notes.

A GUIDE TO MIDDLE-EARTH, by Robert Foster
Complete concordance.

H. G. WELLS: CRITIC OF PROGRESS, by Jack Williamson.
Wells, the father of modern SF, displays his changing concepts of the future in his fiction. Williamson, a popular SF writer himself, makes Wells come alive—without sacrificing accuracy or scholarship.

ASIMOV ANALYZED, by Neil Goble.
So, just what **does** make a book readable as well as informative? Here is a study of the writing style of one of America's most popular SF as well as science (and almost every other field!) writers.

THE MIRAGE PRESS, Ltd., P. O. Box 7687, Baltimore, Md. 21207

KC IN '76

Before voting this year for the '76 Worldcon site, carefully consider the possibility of Kansas City as your final choice. Why? Well, our centralized location, our experienced fan group, and our hotel facility-- the Muehlebach, with its 700 rooms and 51,000 sq. ft. convention center, are only three very good reasons. If you are still undecided, look up our representatives at Minicon 8, or write to us for a copy of our FREE bidding information brochure. Please address all inquiries to:

THE KANSAS CITY IN '76 COMMITTEE POST OFFICE BOX 221
KANSAS CITY, MISSOURI 64141
