GOING MOBILE WITH THE BOSKONE SCHEDULE

The Boskone 55 schedule is available in two forms, optimized for viewing on mobile devices.

Grenadine Event Guide is an application available for iOS and Android, and it is the event planning database used to produce the Boskone 55 program.

Once you have installed and launched the application, enter code BOSKONE55 to download the correct schedule.

If you have already downloaded the Grenadine app for a previous Boskone convention, you can access the Boskone 55 schedule by going to Options within the app and choosing Switch Convention. Enter the code BOSKONE55 and you will see this year's schedule populate on your device.

KonOpas is a website that can be viewed in any browser, and it will store all of its data in the browser for you to view later with or without internet connectivity. Just navigate to <http://schedule.boskone.org>

PROGRAM SCHEDULE

FRIDAY

February 16, 2018

2:00 PM (free to public)

Star Wars Mad Libs

Mihku Paul (M), Frank Wu, Kaitlin R. Branch, Inanna Arthen, Mary Robinette Kowal Griffin · 60 min · Game Show
Who doesn't love a good session of Mad Libs, Boskone style? Join us for a special edition of *Star Wars Mad Libs* — in which the audience provides the nouns, adverbs, and adjectives for a raucous reading performed by our panel of program participants.

Moonquake Escape / Leaf Me Alone

Harbor I · 240 min · Gaming

Generation Ships

John R. Douglas (M), Jeffrey A. Carver, Cady Coleman, Vincent O'Neil, Stacey Berg Marina 2 · 60 min · Panel
Generation ships, interstellar arks that travel at sublight speed, are all the rage in science fiction, and real-life scientists are even looking at the possibility of sending ships in space to far-off planets. Even if the science were possible, should we actually use generation ships to populate new worlds? Is it fair to the children? What are we asking of them? What might we lose or gain in the process?

AIs and the Female Image

Victoria Sandbrook (M), Catherine Asaro, Christine Taylor-Butler, Laurence Raphael Brothers, John P. Murphy Marina 3 · 60 min · Panel
When it comes to AIs wearing mechanical bodies, until recently, many

"female" AIs were all about gorgeousness and sexuality. Now some portrayals emphasize strength and intelligence. Can you do both? How well do these creations represent women, metaphorically or realistically? How does the representation of "male" AIs differ?

Stories Before the Apocalypse

Juliana Spink Mills, James Patrick Kelly (M), Julie C. Day, Alan Gordon, John Chu Marina 4 · 60 min · Panel
We're familiar with post-apocalyptic futures, from Max's desert hellscape to Katniss's dystopic districts. But what about right *before* the cataclysm — as doom and destruction loom large? How do people live? How do relationships change as we shift into survival mode? Let's share our few existing "must-read" favorites, and discuss stories we'd like to see.

3:00 PM (free to public)

1950s — The Golden Age of SF Movies

Daniel M. Kimmel (M), Garen Daly, Nat Segaloff, Vincent Di Fate, Eric Van Griffin · 60 min · Panel
Soon after World War II, as the Cold War introduced chilling new threats to the world's peace of mind — Hollywood (and Tokyo) launched an avalanche of SF and monster-related movies. Was this a golden age? Or were these flicks mostly cheap shockers that kept recycling variations on the theme of "Monster Attacks!"?

New to the con? Or returning after a long absence? Join us for a short discussion about what Boskone has to offer. Hear the highlights, learn some lingo, and meet new people who love the same strange things you do — plus some weird new stuff of their own! Then join our docents for a stroll around the con.

My Favorite Game

Auston Habershaw, Walter H. Hunt (M), Carlos Hernandez, Dan Moren, M. C. DeMarco
Lewis · 60 min · Panel

Join us as we explore the wonderful world of board games. Our panel of expert gamers will discuss their favorites from the past 10 years. We'll compare bragging rights, and swap tales of our victories (or defeats). Let's include our top ten lists — feel free to bring and share your own!

Armchair Detectives

Leigh Perry (M), Timothy Liebe, E.J. Stevens, Mary Kay Kare, Brendan DuBois
Marina 1 · 60 min · Panel

Crime and fiction have long been a popular pairing. But what have science and technology done to the prospects of pulling off the perfect murder? How much trickier must authors get to keep their readers guessing, especially in this new age of the armchair detective?

One-Book Wonders

Beth Meacham, Michael Stearns (M), Bob Devney, Greer Gilman, John R. Douglas
Marina 2 · 60 min · Panel

Publishers (and authors) love the continuing sales and predictable incomes of a good series. But not all readers feel happy committing to a 10-volume epic fantasy saga with 500+ pages per book. The works we cherish most may be a tale well told between a

single pair of covers. Let's share and discuss our favorite stand-alone stories.

The Real Hero of Hogwarts

Priscilla Olson (M), Julia Rios, Pete Hollmer, Gabriel Erhard, Flourish Klink

Marina 3 · 60 min · Panel

Everyone knows the Harry Potter series. Harry is at the center of the story with events swirling around him, but is he the real hero? In fact, is there any real hero at Hogwarts? Let's discuss heroism. What does it take to be a hero — and what does that even mean in a place like Hogwarts?

Angels in Speculative Fiction

Bob Kuhn (M), Alexander Jablovkov, Victoria Sandbrook, Teresa Nielsen Hayden, Walt Williams

Marina 4 · 60 min · Panel

Angels in fantasy, science fiction, and horror aren't always what you might expect. There are the ones that behave, well, angelically, and the fallen angels — but also bad-tempered angels, angels from advanced civilizations, and more. What attracts writers (and readers) to this motif? What common themes, like redemption or the Fall, recur? Are there novel ways to write an angel?

4:00 PM (free to public)

Curse Your Inevitable Romantic Subplot!

Suzanne Reynolds-Alpert, J. Kathleen Cheney, Kevin McLaughlin, Heather Albano (M), Juliana Spink Mills

Burroughs · 60 min · Panel

Just when things are getting good, somebody has to go and fall in love. Are romantic subplots required? And what makes them work or fail in the larger storyline?

Dragonar Academy

Carlton · 100 min · Film/TV/Media

Ash is a student at Ansalivan Dragon Academy, attended by children who have formed contracts with dragons. He

possesses the "star mark," the sign of a contract, but since his partner hasn't been born yet, he seems insignificant. The awakening of the dragon he's raising inside his body is triggered by an incident, and it emerges in the form of a young girl.

Revisiting Big Dumb Objects

Mark L. Olson (M), M. C. DeMarco, Daniel P. Dern, Jeff Warner, Brendan DuBois

Harbor III · 60 min · Panel

Big Dumb Objects (BDO) are so called because they evoke a sense of wonder simply by existing. The objects themselves are numinous: no plot needed, no characterizations should bother to apply. The term, really, is a bit of a putdown; is it fair? The case can be made that BDOs are one of SF's truly unique inventions, and ought to be appreciated as such. So let's celebrate the Big Dumb Objects we know and love — and perhaps a few we've missed along the way.

Japanese Light Novels

Kaitlin R. Branch

Lewis · 60 min · Solo Talk

Some of the most popular Japanese anime has come out of light novels.

We'll discuss what differentiates these novels from SF/fantasy literature from the U.S., run down some of the most popular titles, and explore what makes these books so popular.

The New Doctor Is Coming!

Jim Mann (M), Don Pizarro, Carrie Cuinn, Dana Cameron, Gerald L. Coleman

Marina 1 · 60 min · Panel

The new Doctor Who has a female body. That's great, but really is that all we're looking forward to this year?

What else is in store for the good Doctor? And will her new appearance change the character we have grown to love? Will she, like Missy, become softer? Will she have a female companion? And why did she choose a female body this time?

Reimagining the Book

Jen Gunnels

Marina 2 · 60 min · Solo Talk

Does print have to come first? What other forms matter? How does format affect the "book" quality and/or sales? What might be a much-needed change for the future? How about releasing books as serials, as we did in the distant past? Let's think outside of the book box.

Big YA

Michael Stearns, Tamora Pierce, Christine Taylor-Butler, Gregory Katsoulis (M), E. Ardell
Marina 3 · 60 min · Panel

What is Big YA? Well, it's a term we just made up here at Boskone to talk about the intricacies of writing, editing, and publishing big, long young adult series. What are the challenges associated with writing a series where the characters often don't age as quickly as their readers? How do you track all the details without dropping threads? And why are these long epic YA series so popular today?

The 10 Books That Made Me a Fan

Steve Davidson (M), Tony Lewis FN, Kenneth Rogers Jr., Genny Dazzo, Patrick Nielsen Hayden

Marina 4 · 60 min · Panel

There are books that interest us, books that inspire us, and books that stimulate us to read more! Our panelists share the books that made them fans and kept them reading. What's so special about these works?

Law and Justice in Speculative Fiction

B. Diane Martin, Bracken MacLeod, Kenneth Schneyer (M), Alan Gordon, Auston Habershaw

Burroughs · 60 min · Panel

In an SF or fantasy world, justice may be meted out by a familiar legal system, by religious hierarchies that rule through faith, by some corrupt order that props up an evil regime, etc. How do you show the complex evolution/interplay of a society and its justice system in a single tale? Why do so many stories concentrate on crime and criminals? How do you quickly sketch out a justice system for a culture that's different from our own?

Interstellar Travel — Separating the Reality From the Fiction

Les Johnson

Marina 1 · 60 min · Solo Talk

Traveling to the stars will be difficult, and require engineering on a scale unimaginable today — but the laws of nature say it can be done. In this talk, Les Johnson will describe the distances involved, the propulsion systems that will and won't work for getting us (or our robotic probes) to another star, and the status of research toward making interstellar travel possible. Note: Only technologies based on real physics will be described!

Collaborating With Others

Sarah Smith, LJ Cohen (M), Adam Stemple, Craig Miller, Tom Easton, Jane Yolen

Marina 2 · 60 min · Panel

Collaboration isn't always easy — learning to work with others, even your friends, can be tricky. But it can create some amazing results. Our participants share their experiences, advice, and questions as they reveal the joys and pitfalls of partnered art.

Incorporating Cultures Into Fiction

Beth Meacham (M), Lauren Roy, Mihku Paul, Carlos Hernandez, Erin Roberts

Marina 3 · 60 min · Panel

In writing, it's hard to navigate between *inclusion* and *appropriation* of a culture or cultural elements. But like it or hate

it, people write what they know ... or at least what they think they know. Complicating matters, the definitions of these two words are fuzzy for many. So, what *is* cultural appropriation? How do we incorporate cultures or aspects of cultures without crossing the line?

Dragonflight by Anne McCaffrey
Rob Greene, Jen Gunnels, Mary Kay Kare, Darlene Marshall, Bob Kuhn (M)
Marina 4 · 60 min · Panel
Fifty years ago, Anne McCaffrey released *Dragonflight*, the first novel in her Dragon Riders of Pern series. This epic fantasy series captured the hearts and minds of generations of readers. What is it about this book and this series that is so compelling?

Robert J. Sawyer
Burroughs · 60 min · Solo Talk
Asimov's Laws of Robotics just turned 75; they date from World War II. Isn't it time we abandoned what, really, is a slaveholder's credo in favor of a win-win scenario for interactions between humans and artificial intelligences? Join Robert J. Sawyer, who wrote a guest editorial for the journal *Science* on "Robot Ethics" and is the author of the Hugo Award-nominated *Wake*, which seeks just such a non-zero-sum solution, for a lively talk followed by audience discussion.

The Sword in the Stone: A New Beginning for the Arthurian Legends?

Faye Ringel, Elizabeth Bear, E. Ardell, Auston

Habershaw, Heather Albano (M)

Marina 2 · 60 min · Panel

First published in 1938 as a stand-alone tale, T. H. White's *The Sword in the**Stone* departs from older sources to (wonderfully) imagine King Arthur as a

boy in Merrie Olde England. What did it bring to now-popular tropes such as

shapeshifting, the hidden prince, or the magical education? Later incorporated

into the first part of White's 1958 novel *The Once and Future King*, it helpedspark the musical *Camelot*. (And, of course, *Spamalot*.) Would we remember

much about King Arthur, his Knights,

and their Round Table without these

books? How did they influence the

wider fantasy genre? Have they been

replaced by the stories they inspired?

Folktales Within Poetry

Theodora Goss (M), Jane Yolen, C. S. E.

Cooney, John Chu, Trisha Wooldridge

Marina 3 · 60 min · Panel

From "The Lady of Shalott" to "Goblin

Market" to *The Iliad*, some quite

engaging poems are inspired by

folklore, legends, or myths. What other

examples can we add — perhaps from

non-European poetry? What do folk

might lack? Our panelists will discuss

(and perhaps read) some of their

favorites — what are yours?

Heinlein's Rules for Writers

Future of Noir

Alexander Jablovok (M), Nik Korpon, Vikki Ciaffone, Laurence Raphael Brothers, Christopher Irvin
Marina 4 · 60 min · Panel

Noir (the French word for “black”) began as a Hollywood subgenre depicting hard-boiled, cynical characters in sleazy settings. It’s certainly found a new home in urban fantasy. But is the murky world of noir inherently incompatible with the sleek, shiny surfaces of science fiction? Or as our visions of the fruits of science and technology grow darker, does noir have a future as a main strain of SF?

Fantasy in Gilbert & Sullivan

Ellen Asher, Greer Gilman, Timothy Liebe, Faye Ringel (M), Daniel P. Dern
Marina 3 · 60 min · Panel
Fandom and the comic operas of Gilbert and Sullivan go back a long way. Isaac Asimov was an avid Savoyard (G&S fan), as have been many other SF/F writers. The operas themselves exemplify — and parody — the tropes of fantasy (*Iolanthe*), medievalism (*Patience*), and Gothic horror (*Ruddigore*, *The Sorcerer*). Boskone also has special connections with G&S. Why are these Victorian masterpieces still so popular in (and out of) fannish culture?

Fresh Fantasy Worlds

Gerald L. Coleman, Andrea Corbin, John R. Douglas (M), Marshall Ryan Maresca, Patrick Nielsen Hayden
Marina 4 · 60 min · Panel
“High” fantasies in much of western speculative literature lean heavily on the European Middle Ages for inspiration. Pastoral landscapes, Camelottian castles, noble knights, distressed damsels. All much loved — all done to death. (Or killed off by George R. R. Martin.) Why do we still cling to them so? What’s it take to create a fresh fantasy world? Besides European models, what other options are there? And how do you enliven tropes, settings, and situations that have become old hat?

Earth is just one tiny speck in the universe, not to mention the multiverse (if that even exists). From planet to planet, life likely starts in different ways and evolves according to its own rules, influences, and experiences. How might different origins lead to the evolution of different types of people, different societies, and different understandings of personhood and psychology?

European expansion into the American West and other "new frontiers" used to be portrayed as a great adventure — and a civilizing enterprise. For those being invaded, however, colonial expansion has been less pleasant. The Space Act of 2015 allows the commercialization of space by private entities. But if powerful technocrats like Elon Musk use tropes from Westerns to promote Mars exploration, will we venture into space with the same old colonialist attitudes? Or can we learn from history, and approach space exploration with new mindsets?

Perhaps the most piquant part of beloved animated TV series *The Adventures of Rocky and Bullwinkle and Friends* (1959–1964) was the dry, sly, wry humor of its “Fractured Fairy Tales” segments. Fantasies set in the past are growing ever more popular. Why do we love stepping back in time and sprinkling a little magic into the past? Could these same stories be told in modern times, or would some of that magic be lost? And when changing the workings of the known world by adding magic, is it still important to keep historical details correct?

Marina 1 · 60 min · Panel
The Big Bang that set off the media explosion of the DC and Marvel Universes has continued to produce films, television shows, games, and comics at a near exponential rate. Is DC doing better? What's up with Marvel? From *Wonder Woman* to *Guardians of the Galaxy Vol. 2*, we'll dish on our favorites as well as the good, the bad, and the ugly released over the last year in our super universes.

The Scientific Method in SF

Marina 2 · 60 min · Panel
Scientists abound in science fiction. Do these characters behave like real scientists, the good and the bad? Which authors get it right as they present positive images of scientists, and depict the way they work? The "mad scientist" is a common type in our literature — but is that really the way scientists go wrong?

LGBTQ characters on TV and film are often just sidekicks, and can tend to be one-dimensional. But a few feel like whole and complete people. One such TV standout: Alex Danvers, aka Supergirl's sister. What makes her character so well-crafted? Has the revelation of her sexuality changed her portrayal, or our perception of who she is? What other examples of strong LGBTQ characters come to mind?

Invaders from Mars (1953) — and More!
Movie Mike
Carlton · 115 min · Film/TV/Media
16mm Films in the Evening with Movie Mike. Only the kid knows that they've landed and burrowed in behind the house. They've taken over his mommy and daddy and the police via brain control radio. It's a paranoid child's nightmare of alienation, directed by William Cameron Menzies, with Leif Erickson, Hillary Brooke, and little Jimmy Hunt. Milburn Stone (Doc from *Gunsmoke*) is the tough old colonel who saves the day. Note the lovely stark effectiveness of the police station scene, and the brilliant use of stock military footage for epic effect. Don't miss the zippers on the backs of the huge Martian mutants as they shuffle through the underground tunnels of their secret base. And those "raygun-melted" tunnel walls are clusters of balloons: notice they stir in the breeze. Menzies excelled at design, and this film is beautifully composed and shot, with good props, sets, and costumes. This movie runs 78 minutes, so we'll add a condensed version of *This Island Earth* that includes the flying saucer trip, space war on the planet Metaluna, and that big insect mutant — all good stuff you will like.

 That's awfully funny! Horror and humor may be strange bedfellows, but the two genres can combine in surprisingly complementary ways. How can you best weave them together into a terribly amusing tale? And why do they work so well together?

LGBTQ Elements in Speculative Fiction

Steve Berman (M), John Chu, Susan Jane Bigelow, Christian Baines, Julia Rios
 Marina 4 · 60 min · Panel

Where are all the LGBTQ characters in SF/F/H? They may exist — but are often relegated to secondary or background status. What can we do to elevate them to main characters? Our panelists cite some of the best LGBTQ speculative fictions being published, and what makes these pieces stand out. Generally, what authors and publishers should we be following?

Parable of the Sower by Octavia Butler
Jennifer Pelland (M), Vandana Singh, Kenesha Williams, Scott Lynch, Marshall Ryan Maresca
Burroughs · 60 min · Panel

Octavia Butler's prescient dystopian novel *Parable of the Sower* was written 25 years ago. Set in the 2020s, it presents a society beset by climate change, social and economic collapse, corporate greed, wealth inequality ... need we go on? What did Butler's masterpiece get right — and wrong? How do her beleaguered characters cope? And what can the novel teach us today?

 How dark is too dark when it comes to dark fantasy and horror for younger readers? Is there an invisible line in the sand? Should we provide kids with more happy endings? And what draws them to these stories in the first place ... even when none of the characters are children?

2001: A Space Odyssey by Arthur C. Clarke

William Hayashi, Robert J. Sawyer, Steven Popkes (M), Laurie Mann, Eric Van

Marina 2 · 60 min · Panel

Fifty years ago, *2001: A Space Odyssey* stormed the screens and bookstores of the science fiction and science worlds. (Clarke's book and Stanley Kubrick's film were developed concurrently, based on Clarke's 1951 short story "The Sentinel"; both men worked at writing both; the movie was actually released first.) As icons of the genre, these works transformed the way people think about science fiction, space, AIs, and more. Where are we 50 years later? Is *2001* still the classic it was? Do the science and story still hold up? What did it tell us about our future, and are we there yet?

Women Who Write Science Fiction

 Marina 3 · 60 min · Panel
 Mary Shelley, Leigh Brackett, Ursula K. Le Guin, Connie Willis, N. K. Jemisin — women have been in the thick of writing science fiction for a very long time. Let's discuss some of their landmark publications that captured our imagination. Why do we love these stories? What works should we look for the next time we're browsing the shelves?

"Realistic" Hackers

John P. Murphy (M), Walt Williams, Dan Moren, Laurence Raphael Brothers, Brianna Wu
 Marina 4 · 60 min · Panel
 Computer hackers are often depicted as genius young criminals who work in their parents' basements, as guys who are nonconforming loners, as sexy quirky girls who rock killer glasses. The truth is far more complex. Let's hack the hacker mythology, and debunk the creepy caricatures we see on TV and read about in books. Are there any good examples out there of hacker characters who are realistically portrayed?
